

SAM2 REPORT

This report is an overview of one SAM2 positioned on London Road Downham Market.

The dates are between 10/09/24 and the 04/10/24

Typical data for this period is as follows.

The highest volumes of traffic is obviously between the times of 07:00 and 21:00 hours.

The total counts of traffic above 27 mph was:

A low of 1973 vehicles, to a High of 3487 depending on the day. As obviously a Sunday is the quietest day.

The average speeders ranged from a speed of 38.0 MPH up to 38.9.MPH. The highest speeds were a range from 45 MPH to 55 MPH and a significant number of vehicles travelling at 50 MPH.

The evidence from the data collected from this machine has been forwarded to our contacts at the Police, and it will be up to them to take appropriate action, which we will be talking about at our next SNAP meeting.

May I draw your attention that the next SNAP meeting is held at The William Burt Centre, West Winch on the

12th November at 19:30 hours, and anyone from the public can attend. It is an opportunity to speak to your local beat officers of any concerns in your local area
